

Industrial Engineer

Comprehensive Logistics is a leading 3rd Party Logistics Provider delivering highly efficient engineered solutions to complex supply chains. We have an opening for an experienced Industrial Engineer at our Corporate Office in Youngstown, OH. We are looking for a proactive, self motivated individual to work directly with the Operations and Sales teams to develop logical and operational plans. **The ideal candidate must demonstrate experience working for a major 3PL company with an emphasis towards industrial/logistics engineering.** This person will analyze new and existing account profitability; participate in process improvement initiatives and assist with facility start ups.

Education/Experience Requirements:

- BSME or BSIE Degree
- Must have 5+ years experience in a warehousing/distribution environment with an emphasis towards industrial/logistics engineering
- Must have 3PL experience or other warehousing/distribution manufacturing experience
- Automotive manufacturing experience a plus

Qualifications:

- Ability to conduct various studies (time/motion, STDS, work flow)
- Ability to make process improvements in order to make a warehouse more efficient
- Ability to interact effectively both with customers and internal team members and departments
- Experience with facility design and layout as well as strong AutoCAD knowledge
- Experience with new customer integration/startup
- Strong PC skills, including proficiency in Microsoft Word, Excel, PowerPoint, Access and Project
- Proven ability to work with third party logistics providers and supply chain operators.
- Strong problem solving and analytical skills (FMEA's)
- Able to prioritize and manage time efficiently
- Ability to work with minimal direct supervision
- Design and implementation of build/assembly aids (i.e. Lift Assists, Torque Gun, Arms/ Balancers, etc.)
